

▼ **INGREDIENTS**

Supplement Facts		
Serving Size: 3 capsules		
Amount Per Serving	% Daily Value	
Vitamin E	140 IU	467
L-Alanine	3 mg	*
L-Glycine	3 mg	*
L-Methionine	3 mg	*
L-Serine	3 mg	*
L-Tyrosine	3 mg	*
L-Aspartic Acid	3 mg	*
Proprietary Blend	1160 mg	*
RNA/DNA Duodenal Tissue Factors; Allantoin; RNA/DNA Stomach Tissue Factors; Aloe Vera (Leaves); Sodium Copper Chlorophyll		

* Daily Value not established.
Other Ingredients: Gelatin, Dextrose and Leucine

▼ **DOSAGE**

- 1 - 2 capsules with a BioFunction or other formula, twice a day, for 2 to 4 weeks.
- Concentrated Extract: 3-5 drops twice a day.

▼ **PACKAGING**

- Capsules: 30/eco-bottle.
- Concentrated Extract: ½ oz. glass bottle with dropper.

▼ **PERSPECTIVE**

The BioCommand System employs commanding formulas to “direct” the impact of a BioFunction formula in six different directions: Activation, Building, Bacterial Relations, Fungal Relations, Normalization, and Deep Repair processes thus adding an overtone directive to the concept of targeted nutrition.

▼ **LIFESTYLE**

#2 (Builder)

#2002 (CX2 Builder)

A cutting edge and unique concept in targeted nutrition. Designed to be paired with a BioFunction formula that targets a specific tissue, e.g. B (Brain) + #2 (Builder) in tandem. Designed to provide additional nutritional support for the targeted tissue with a focus on its inherent re-building, self-maintenance processes that occur during the tissue’s restful, re-construction cycle. This formula supports and encourages cellular health and integrity of the targeted tissue or organ during its normal circadian “building” cycle by providing important cellular amino acids and nutrients.

- Nutritionally supports a tissue’s inherent building function during the building cycle
- Strong affinity for the digestive system
- Supports the normal rebuilding processes, e.g. post exercise, post trauma, post cleansing
- Designed to magnify the supportive impact of BioFunction formulas

▼ **INDICATIONS**

- Support cellular metabolic processes toward building tissue integrity and normal maintenance functions
- Magnify the impact of the companion BioFunction formula
- Digestion: provided amino acid building blocks
- Improve assimilation of nutrients with cellular amino acids and plant nutrients

▼ **KEY COMPONENTS**

- **Allantoin** – A derivative from the comfrey plant cited to help the body preserve its normal, youthful cell activities.
- **Aloe Vera** – Time-proven botanical that’s renowned as a soother, protector, and enabler of the body’s innate repair processes.
- **RNA/DNA Stomach Factors** – Amino acid cellular identity factors for stomach tissue integrity.
- **RNA/DNA Duodenum Factors** – Amino acid cellular identity factors for the duodenal stomach tissue integrity.
- **Aspartic Acid** – An amino acid required for the biosynthesis of cellular proteins. Helps engage digestive metabolic processes.
- **Vitamin E** – A natural, essential vitamin and necessary nutrient for DNA processes. Esteemed as an antioxidant.
- **L-Alanine** – A master amino acid necessary for protein biosynthesis. Required by cells to stabilize their glucose metabolism. Supports normal immune system and muscle repair processes.
- **Glycine** – Helps convert glucose into the energy required for tissue repair. Supports the brain’s normal metabolic processes. Supports the stomach and liver.
- **Methionine** – A sulfur-bearing, essential amino acid. Supports the body to make glutathione, the premier cellular antioxidant.
- **Serine** – An amino acid that supports RNA and DNA function, as well as forms phospholipids necessary for cell membrane integrity.
- **Tyrosine** – An amino acid that supports the adrenals, pituitary, and thyroid, as well as neurotransmitters such as dopamine and norepinephrine.

- **Sodium Copper Chlorophyll** – The green juice of plants with similar chemical structure to healthy blood. A powerhouse of nutrition.

▼ **CONTRAINDICATIONS**

Best avoided if patient is on a Rx MAO Inhibitor. Contains tyrosine which can elevate blood pressure if MAO Inhibiting drugs are being used.

▼ **CLINICIAN CONSENSUS**

Example of BioCommand #2 Utilization:

- **Support the thyroid’s metabolic rebuilding activity:**
#2 Builder
#39 Gf-Thyroid
- **Support the adrenal gland’s metabolic rebuilding activity:**
#2 Builder
#31 Ga-Adrenal

▼ **BACKGROUND**

BioCommand formulas are a milestone breakthrough in the history of herbology. They were designed by Doc Wheelwright to increase the effectiveness and action of a BioFunction formula (specific tissue nutrition) through enhanced assimilation, increased tissue receptivity, and most importantly, by specifying the direction and impact of the combined herbal matrix toward one of six specific cellular functions (commands). This allows the herbal practitioner greater precision in clinical applications of herbal medicine.

▼ **SYNERGISTIC CONSIDERATIONS**

#2 (Builder) is a complimentary, enhancing formula to any of the BioFunction formulas and many other Systemic formulas by its inclusion. Clinicians’ favorite applications include:

- B (Brain) + #2 (Builder)
- C (Colon) + #2 (Builder)
- D (Digestive) + #2 (Builder)
- Ga (Adrenal) + #2 (Builder)
- Gb (Pituitary) + #2 (Builder)
- Gf (Thyroid) + #2 (Builder)
- Gt (Thymus) + #2 (Builder)
- H (Heart) + #2 (Builder)
- I (Eyes) + #2 (Builder)
- K (Kidney) + #2 (Builder)
- L (Liver) + #2 (Builder)
