

▼ **INGREDIENTS**

▼ **DOSAGE**

- Adults: 2-6 drops 3 times a day, orally, or as directed.
- Children: 1-2 drops in water, orally 3 times a day, or as directed.

▼ **PACKAGING**

- Liquid: 1 fl oz.

▼ **PERSPECTIVE**

Cat's Claw is a rainforest botanical that holds a primary position in the South American herbal tradition where the Portuguese and Spanish materia medicas attribute many wonders to its use for both topical and internal applications. Cat's Claw has been meticulously researched in England, Austria, Peru, and Germany for its capabilities to help the body's normal spirochete, piroplasm and protozoa relationships via its oxindole and isopteropodin alkaloids, as well as its innate glycosides, proanthocyanidins and beta sitosterol components. Such studies have made Cat's Claw a hugely popular herb in the United States.

▼ **LIFESTYLE**

**#210 CA (Cats-A-Tonic)**

This herbal extract combines the Cat's Claw herb (Uña de Gato – *Uncaria tomentosa*) famous for its role in helping with a huge variety of normal body self-regulatory processes such as normal DNA repair, digestive and intestinal regulatory activities, and normal immune system responsibilities.

▼ **INDICATIONS**

- Immune support for normal relations with virus, bacteria and fungus
- Normal recovery support from herpes outbreaks
- Digestive and intestinal support of healthy processes
- Antioxidant support for the entire body

▼ **KEY COMPONENTS**

- **Cat's Claw** – Oxindole and Isopterododin molecules found in the bark and roots of Cat's Claw have been documented in numerous research studies to help the normal immune function and its daily challenges via key alkaloids, antioxidants, and their impact to support normal metabolic functions.
- **Stevia** – Known primarily as an herb which sweetens beverages via proteins and not sugars, Stevia is also a well-respected herb with whole body supportive applications; especially for its documented ability to support normal immune system activities.
- **Pau D'Arco** – The world-famous rainforest herb well-researched for its impact on normal immune relations with the fungal forms that abound in the damp jungles of South America.
- **Ascorbic Acid** – A form of Vitamin C that assists the normal removal of cellular waste products.
- **Beet Root** – A food nutrient touted for assisting the body's normal cleansing processes.
- **Peach Bark** – One of Doc Wheelwright's favorite herbs to gently support the normal self-cleansing processes at the cellular level.

▼ **CONTRAINDICATIONS**

Generally safe and well tolerated, but should not be used during pregnancy. Some caution for use with antihypertensive medications, those with autoimmune conditions, or individuals undergoing organ or tissue transplants.

▼ **CLINICIAN CONSENSUS**

- Support Normal Immune Processes:  
**#210 CA** - Cats-A-Tonic  
**#241 EV** - Elixir Vita  
**#243 IA** - Imperial Ataker

▼ **BACKGROUND**

Responding to a leading practitioner's request for a liquid, immune tonic to support the body's normal immune processes, CA features a synergistic blend of herbs and nutrient activators that are based on numerous scientific studies.
