

▼ **DIRECTIONS**

- **For 30 Days:**
Once Per Day: Take one "Daily Serving" Packet,
- **Important:** Increase amount of liquid intake while taking Systemic Formulas Cellular Vitality.
- Package Duration is at Practitioner Discretion. Full Package May Be Repeated By Direction of Practitioner.

#942 Cellular Vitality

Cellular Vitality keeps the purification pathways open and nourishes your cells for optimal health. It helps maintain healthy methylation, supports optimal glutathione antioxidant activity, and incorporates herbal extracted vitamins and co-factors to provide your cells with the nutrition they need to thrive.

▼ **USE FOR**

- Supports normal methylation processes
- Assist healthy liver enterophepatic circulation cycle cleansing
- Supports normal methylation processes.
- Supports normal mitochondria function for optimal cellular energy.

▼ **SUPPLEMENTS**

- **Vista 2 (Membrane Regeneration)** – is a revolutionary product which supports cell membrane integrity via essential phospholipids, antioxidants, amino acids, and botanicals. This groundbreaking formulation provides essential and unique nutrients to the mitochondria, golgi, endoplasmic and plasma membranes. Vista Promotes healthy cell membrane structure and helps maintain overall health.

Key Ingredients: Chia Seed Oil, Omega 3 (Linoleic Acid), Omega 6 (Alpha- Linoleic Acid)

- **MoRs (Methylation Donor)** – Provides nutrients to support methylation, which promotes healthy homocysteine metabolism. Providing the L-5-methyltetrahydrofolate form of folate along with vitamins B6 and methylated B12, genistein, choline and a full herbalomic blend helps ensure better folate nutrition—especially in those with genetic variations in folate metabolism. Methyl molecules (CH3) serve thousands of metabolic processes including detoxification; and serving as "on/off" switches of genetic, chromosomal expression. Methyl molecules are necessary for intracellular metabolic function, and epigenetic expression of health.

Key Ingredients: 5-MTHF Vitamin B9, Mythylcobalamin Vitamin B12, Genistein

- **DV3: Vitamin D3**—is a unique formula of vitamin D3 plus vitamin E, beta glucan, turmeric, L-carnitine, calcium, magnesium, and includes liver and kidney support. Replete with the necessary Vitamin K2 which should always accompany Vitamin D supplementation, this is a top of the

line, clinically effective supplement for establishing activated vitamin D receptors associated with optimal health. In Vitro studies have shown vitamin D metabolites modulate expression and secretion of type 1 interferon and chemokines including CXCL8 and CXCL10.

Key Ingredients: Vitamin D3, Beta Glucan, Turmeric

- **GCEL (Intracellular Glutathione)** – The premier source of acetyl-glutathione in an herbalomic blend for maximum efficacy. Gcel provides a blend of herbalomic ingredients along with acetyl-glutathione designed to help boost the body's production of glutathione peroxidase, a primary antioxidant throughout the entire body. Historically, glutathione supplementation has been ineffective because it is degraded in the G.I. tract and in the bloodstream, thus supplemental sources have been difficult. That changed with the advent of "acetyl-glutathione," the only form to date that is clinically proven to reach the cells.

Key Ingredients: 5-Acetyl L-Glutathione, Alpha Lipoic Acid, 5MTHF

- **SpectraOne: (Herbal Whole Food Cellular Multi-Vitamin/Mineral)** – is the first 100% certified organic, plant-based, full-spectrum (synergists included) Multi Vitamin/Mineral supplement. As a cellular healing formula, SpectraOne delivers the purest forms of whole food nutrients. This unique formulation supports cellular health by providing maximum bio-availability. The nutrients are extracted from the plants: Guava, Lemon, Amla, Sesbania, Holy Basil, and Annatto. The Vitamin B12 is synthesized by bacteria—just like probiotics do in the human G.I. Tract.

Key Ingredients: Cold Extracted Vitamins, B12 Hydroxocobalamine, Resveratrol

▼ **CONTRAINDICATIONS**

- Consult with physician if Pregnant, in Renal Failure, a recipient of an organ transplants, or if diabetic taking insulin.

▼ **NEXT PHASE**

- Continue Cellular Vitality for Maintenance, or Repeat Prep, Body, or Brain Phase
